We handle the extraordinary

Our **Project Cargo** programs provide you with the best shipping options for materials, machinery and vehicles that, due to size and weight, cannot be moved by traditional means. **Customized solutions** have been designed for these situations including: break bulk, mafi trailer, flatbed and barge/OOG truck shipping methods.

We offer **customized solutions for oversized and overweight materials.**

Find out about our services

What makes us unique

Oil & Gas

We work alongside leading **EPCs** in the industry, taking care of every segment of the supply chain in a **professional manner** and providing integrated solutions to onshore and offshore logistics.

Renewable Energies

Environment is very important to us, so we have developed shipping programs for the renewable **energy industry**. Organizing the movement of all components of different solar and wind power plants that often have **strict shipping schedules** and doing so in the same professional manner for which we are known.

Mining and industrial projects

In both the mining and big industrial plant sectors, we handle all that is required for shipments of **large quantities of goods, or bulky, or heavy materials**.

Special attention is devoted to everything from timing to safety, and even cost management.

NGO

We join together with various organizations to assist in **international humanitarian operations** that require the movement of industrial vehicles, construction materials or **emergency supplies**.

Logistics solution

In addition to studying the best solution for handling heavy or oversized loads that cannot be shipped using standard shipping channels, we offer the following services:

- On-site inspection to view the goods
- Discussing with the manufacturer's technical staff
- Choosing the best partners
- Creating ad-hoc packaging
- Relevant loading and lashing aboard the transport vehicle
- Specialized charter service for large goods
